DIV OF WATER RESOURCES
RECEIVED

Agreement for Removal of Litter, Litter and/or Process Wastewater from an AFO
(base on Appendix A of, TDEC Division of Water Pollution Control, Chapter 1200-4-5 Permit Effluent Limitations and Standards, July 2004).

The conditions listed below help to protect water quality. These conditions apply to litter, litter and/or process wastewater removed from an AFO. The material covered by this agreement was removed on

743.72 tons from the facility owned by Deniers Poultry, located at _____

- A. The litter, litter and/or process wastewater must be managed to ensure there is no discharge of litter, litter and/or process wastewater to surface or ground water.
- B. When removed from the facility, litter, litter and/or process wastewater should be applied directly to the field or stockpiled and covered with plastic or stored in a building.
- C. Litter, litter and/or process wastewater must not be stockpiled near streams, sinkholes or wells.
- D. Fields receiving litter, litter and/or process wastewater should be soil tested at least every two or three years.
- E. A litter, litter and/or process wastewater nutrient analysis should be used to determine application rates for various crops.
- F. Calibrate spreading equipment and apply litter, litter and/or process wastewater uniformly.
- G. Apply no more nitrogen than can be used by the crop.
- H. A buffer zone is recommended between the application sites and adjacent streams, lakes, ponds, sinkholes and wells.
- I. Do not apply litter, litter and/or process wastewater when the ground is frozen, or on steep slopes subject to flooding, erosion or rapid runoff.
- J. Cover vehicles hauling litter, litter and/or process wastewater on public roads.
- K. Keep records of locations where litter, litter and/or process wastewater will be used as a fertilizer.

I, _____ am the person receiving litter, litter and/or process
(name) wastewater and I understand the conditions listed above.
